

Air Curtain

We offer Air Curtains of elegant modern design with optimum combination of low noise level, sufficient air flow and minimal turbulence. The Air Curtain is designed for use in the following industries.

- Pharmaceuticals & Food Industries
- Automotive Industries
- Laboratories
- Clean Rooms
- Computer Facilities
- Cold Storages
- Show Rooms & Restaurants
- Electrical & Electronic Industries
- Hospitals & Research Institutes

These Air curtain specially designed to prevent the loss of cool or conditioned air and the entry of hot contaminated air. The products can be used to meet the number of requirements:

- To prevent warm air infiltration in cold shops and door less reach-in refrigerated cases
- To keep out fumes, dust, harmful insects, maintaining a clean environment
- To invite customers in by allowing entry doors to stay open

Air Curtains significantly reduce energy consumption – especially when there is a substantial temperature difference between inside and outside air.
